## **Explanation-Based Neural Network Learning: A Lifelong Learning Approach (The Springer International Series in Engineering and Computer Science) Sebastian Thrun**

Lifelong learning addresses situations in which a learner faces a series of different learning tasks providing the opportunity for synergy among them. Explanation-based neural network learning (EBNN) is a machine learning algorithm that transfers knowledge across multiple learning tasks. When faced with a new learning task, EBNN exploits domain knowledge accumulated in previous learning tasks to guide generalization in the new one. As a result, EBNN generalizes more accurately from less data than comparable methods.

*Explanation-Based Neural Network Learning: A Lifelong Learning Approach* describes the basic EBNN paradigm and investigates it in the context of supervised learning, reinforcement learning, robotics, and chess.

'The paradigm of lifelong learning - using earlier learned knowledge to improve subsequent learning - is a promising direction for a new generation of machine learning algorithms. Given the need for more accurate learning methods, it is difficult to imagine a future for machine learning that does not include this paradigm.'  
From the Foreword by Tom M. Mitchell.

### **From reader reviews:**

#### **Brandi Cardoza:**

What do you think of book? It is just for students since they are still students or that for all people in the world, what the best subject for that? Only you can be answered for that concern above. Every person has various personality and hobby for each and every other. Don't to be pressured someone or something that they don't wish do that. You must know how great as well as important the book Explanation-Based Neural Network Learning: A Lifelong Learning Approach (The Springer International Series in Engineering and Computer Science). All type of book can you see on many options. You can look for the internet methods or other social media.

#### **Delores Saenz:**

What do you with regards to book? It is not important to you? Or just adding material when you really need something to explain what yours problem? How about your spare time? Or are you busy particular person? If you don't have spare time to complete others business, it is gives you the sense of being bored faster. And you have free time? What did you do? Everybody has many questions above. They should answer that question simply because just their can do this. It said that about guide. Book is familiar on every person. Yes, it is appropriate. Because start from on guardería until university need this Explanation-Based Neural Network Learning: A Lifelong Learning Approach (The Springer International Series in Engineering and Computer Science) to read.

#### **Benjamin Deloatch:**

Hey guys, do you really wants to finds a new book you just read? May be the book with the concept Explanation-Based Neural Network Learning: A Lifelong Learning Approach (The Springer International Series in Engineering and Computer Science) suitable to you? The particular book was written by renowned writer in this era. Often the book untitled Explanation-Based Neural Network Learning: A Lifelong Learning Approach (The Springer International Series in Engineering and Computer Science)is the one of several books which everyone read now. This specific book was inspired a lot of people in the world. When you read this guide you will enter the new way of measuring that you ever know before. The author explained their strategy in the simple way, so all of people can easily to comprehend the core of this guide. This book will give you a lot of information about this world now. To help you see the represented of the world in this book.

#### **Cinthia Jacobsen:**

Your reading sixth sense will not betray a person, why because this Explanation-Based Neural Network Learning: A Lifelong Learning Approach (The Springer International Series in Engineering and Computer Science) book written by well-known writer we are excited for well how to make book that could be understand by anyone who all read the book. Written with good manner for you, leaking every ideas and creating skill only for eliminate your own hunger then you still question Explanation-Based Neural Network

Learning: A Lifelong Learning Approach (The Springer International Series in Engineering and Computer Science) as good book but not only by the cover but also through the content. This is one book that can break don't assess book by its handle, so do you still needing another sixth sense to pick this kind of!? Oh come on your reading through sixth sense already told you so why you have to listening to one more sixth sense.
