Terrorism has never been defined in any international convention. Its political content - particularly the fact that much of what we call terrorism is state-conducted or state-sponsored - has led to the restriction of the term in international criminal law to strategies of violence by individuals or small groups. Nonetheless, an extensive body of law designed to control international terror violence has come into being, and it is this assembly of reports and resolutions, conventions and scattered treaty provisions that we must rely on as we move toward an enforceable, unambiguous anti-terrorism regime in international law.
