Mathematics: A Minimal Introduction Alexandru Buium

Bridging the gap between procedural mathematics that emphasizes calculations and conceptual mathematics that focuses on ideas, **Mathematics: A Minimal Introduction** presents an undergraduate-level introduction to pure mathematics and basic concepts of logic. The author builds logic and mathematics from scratch using essentially no background except natural language. He also carefully avoids circularities that are often encountered in related books and places special emphasis on separating the language of mathematics from metalanguage and eliminating semantics from set theory.

The first part of the text focuses on pre-mathematical logic, including syntax, semantics, and inference. The author develops these topics entirely outside the mathematical paradigm. In the second part, the discussion of mathematics starts with axiomatic set theory and ends with advanced topics, such as the geometry of cubics, real and p-adic analysis, and the quadratic reciprocity law. The final part covers mathematical logic and offers a brief introduction to model theory and incompleteness.

Taking a formalist approach to the subject, this text shows students how to reconstruct mathematics from language itself. It helps them understand the mathematical discourse needed to advance in the field.

From reader reviews:

Linda Davis:

Information is provisions for anyone to get better life, information presently can get by anyone from everywhere. The information can be a know-how or any news even a problem. What people must be consider whenever those information which is within the former life are challenging to be find than now is taking seriously which one would work to believe or which one typically the resource are convinced. If you find the unstable resource then you obtain it as your main information it will have huge disadvantage for you. All of those possibilities will not happen within you if you take Mathematics: A Minimal Introduction as the daily resource information.

Anne Stewart:

Does one one of the book lovers? If yes, do you ever feeling doubt when you are in the book store? Make an effort to pick one book that you just dont know the inside because don't assess book by its include may doesn't work the following is difficult job because you are scared that the inside maybe not seeing that fantastic as in the outside appear likes. Maybe you answer may be Mathematics: A Minimal Introduction why because the excellent cover that make you consider about the content will not disappoint a person. The inside or content is actually fantastic as the outside or perhaps cover. Your reading 6th sense will directly direct you to pick up this book.

Luther Jensen:

In this age globalization it is important to someone to acquire information. The information will make you to definitely understand the condition of the world. The fitness of the world makes the information easier to share. You can find a lot of personal references to get information example: internet, magazine, book, and soon. You can see that now, a lot of publisher that will print many kinds of book. Often the book that recommended for you is Mathematics: A Minimal Introduction this e-book consist a lot of the information with the condition of this world now. This specific book was represented how does the world has grown up. The language styles that writer use for explain it is easy to understand. The writer made some exploration when he makes this book. That's why this book ideal all of you.

Michael Slay:

What is your hobby? Have you heard that question when you got college students? We believe that that issue was given by teacher with their students. Many kinds of hobby, Every individual has different hobby. Therefore you know that little person like reading or as looking at become their hobby. You must know that reading is very important as well as book as to be the point. Book is important thing to add you knowledge, except your teacher or lecturer. You find good news or update concerning something by book. Different categories of books that can you take to be your object. One of them is actually Mathematics: A Minimal Introduction.
