Why the Left's anti-hunting propaganda is dead wrong!

Nothing is more hated--and more misunderstood--by the trendy Left than hunting. But now intrepid hunter and pro-hunting activist Frank Minter sets the record straight. In *The Politically Incorrect Guide(tm) to Hunting*, he details the concrete benefits that hunting provides to all of us--even how it helps the environment. Speaking with wildlife biologists, hunters, farmers, anti-hunters, and victims of animal attacks, Minter explains how banning hunting negatively affects wildlife populations and conservation. Minter's fearless, politically incorrect take on hunting lays out the facts that liberal enviro-nuts don't want you to know, including:

- *How a well-intentioned policy of "live and let live" with Florida alligators resulted in human deaths
- *Why you're more likely to be attacked by a bear in an area where hunting is forbidden, such as a national park
- *Why non-lethal alternatives to hunting don't work to control animal populations
- *Why even vegetarians depend on hunting for their dinner (especially those who demand organic or locally grown food)
- *How hunters are wildlife's best defenders--far more effective than big-budget "green" groups
- *How deer cause more human deaths each year than sharks, cougars, bears, and alligators combined
- *Why hunting is statistically safer for kids than football, bicycling, and tennis

If you love hunting, you need to arm yourself with *The Politically Incorrect Guide(tm) to Hunting*, so that the next time you encounter an anti-hunter, you'll be equipped to shoot down politically correct myths and defend this great American sport against all attacks.
