Oracle Database Programming using Java and Web Services Kuassi Mensah

The traditional division of labor between the database (which only stores and manages SQL and XML data for fast, easy data search and retrieval) and the application server (which runs application or business logic, and presentation logic) is obsolete. Although the book's primary focus is on programming the Oracle Database, the concepts and techniques provided apply to most RDBMS that support Java including Oracle, DB2, Sybase, MySQL, and PostgreSQL. This is the first book to cover new Java, JDBC, SQLJ, JPublisher and Web Services features in Oracle Database 10g Release 2 (the coverage starts with Oracle 9i Release 2). This book is a must-read for database developers audience (DBAs, database applications developers, data architects), Java developers (JDBC, SQLJ, J2EE, and OR Mapping frameworks), and to the emerging Web Services assemblers.

- * Describes pragmatic solutions, advanced database applications, as well as provision of a wealth of code samples
- * Addresses programming models which run within the database as well as programming models which run in middle-tier or client-tier against the database.
- * Discusses languages for stored procedures: when to use proprietary languages such as PL/SQL and when to use standard languages such as Java; also running non-Java scripting languages in the database
- * Describes the Java runtime in the Oracle database 10g (i.e., OracleJVM), its architecture, memory management, security management, threading, Java execution, the Native Compiler (i.e., NCOMP), how to make Java known to SQL and PL/SQL, data types mapping, how to call-out to external Web components, EJB components, ERP frameworks, and external databases.
- * Describes JDBC programming and the new Oracle JDBC 10g features, its advanced connection services (pooling, failover, load-balancing, and the fast database event notification mechanism) for clustered databases (RAC) in Grid environments.
- * Describes SQLJ programming and the latest Oracle SQLJ 10g features, contrasting it with JDBC
- * Describes the latest Database Web services features, Web services concepts and Services Oriented Architecture (SOA) for DBA, the database as Web services provider and the database as Web services consumer.
- * Abridged coverage of JPublisher 10g, a versatile complement to JDBC, SQLJ and Database Web Services.

From reader reviews:

Leo Osborne:

In this 21st century, people become competitive in each way. By being competitive now, people have do something to make these people survives, being in the middle of often the crowded place and notice by surrounding. One thing that at times many people have underestimated it for a while is reading. That's why, by reading a e-book your ability to survive improve then having chance to stand up than other is high. For you who want to start reading any book, we give you this particular Oracle Database Programming using Java and Web Services book as nice and daily reading publication. Why, because this book is greater than just a book.

Curtis Monahan:

Do you considered one of people who can't read pleasurable if the sentence chained inside straightway, hold on guys this particular aren't like that. This Oracle Database Programming using Java and Web Services book is readable by means of you who hate those perfect word style. You will find the facts here are arrange for enjoyable examining experience without leaving possibly decrease the knowledge that want to provide to you. The writer connected with Oracle Database Programming using Java and Web Services content conveys thinking easily to understand by most people. The printed and e-book are not different in the articles but it just different available as it. So , do you continue to thinking Oracle Database Programming using Java and Web Services is not loveable to be your top listing reading book?

Christy McCurry:

People live in this new time of lifestyle always try to and must have the free time or they will get wide range of stress from both daily life and work. So , when we ask do people have free time, we will say absolutely of course. People is human not really a robot. Then we question again, what kind of activity do you have when the spare time coming to you of course your answer may unlimited right. Then do you ever try this one, reading publications. It can be your alternative in spending your spare time, the actual book you have read is usually Oracle Database Programming using Java and Web Services.

Katrina Scofield:

In this period globalization it is important to someone to acquire information. The information will make professionals understand the condition of the world. The fitness of the world makes the information quicker to share. You can find a lot of sources to get information example: internet, classifieds, book, and soon. You can see that now, a lot of publisher that will print many kinds of book. Often the book that recommended to your account is Oracle Database Programming using Java and Web Services this guide consist a lot of the information from the condition of this world now. That book was represented so why is the world has grown up. The words styles that writer use to explain it is easy to understand. Often the writer made some investigation when he makes this book. This is why this book acceptable all of you.
