Quantum Genetics V V Stcherbic, L.P. Buchatsky

The systematic review of quantum genetics based on the theory on non-Abelian gauge fields is represented in this book. The concept of fundamental conception of atom's protonic charge is also included. Description of the biological processes is conducted in a six-dimensional space with metric tensor $4+2-$. The properties of main biological structures DNA, RNA and proteins are discussed on the basis of equivalent charge configuration of amino acids of the genetic code. It is proved that the conformal field of amino acids is equal to quantized gravitational field with a spin of $5/2$. This book is intended for specialists in theoretical biology, quantum theory of field, molecular biology and genetics.
