The Judgement of the Eye

Jürgen Weber

The Judgement of the Eye Jürgen Weber

The author, Jürgen Weber, brings together the results of various disciplines and his own research and experience as a sculptor and painter and stitches together an exciting new theory of perception of form. In doing so, Weber - who also has a scientific background - explores the fascinating question of what additional information the thing that is seen conveys. How do we tell the difference between a cheerful and a gloomy face? Why do we see that a bud will open shortly? Why do we find some phenomena to be dangerous and others to be desirable? These questions have not yet been investigated in a systematic and scientific way, although they are of vital importance to our behaviour. No doubt, this book represents a unique and timely contribution to the many disciplines concerned with the wonders of perception.
