Fluorinated ionomer polymers form impermeable membranes that conduct electricity, properties that have been put to use in large-scale electrochemical applications, revolutionizing the chlor-alkali industry and transforming production methods of some of the world's highest-production commodity chemicals: chlorine, sodium hydroxide and potassium hydroxide. The use of fluorinated ionomers such as Nafion® have removed the need for mercury and asbestos in these processes and led to a massive reduction in electricity usage in these highly energy-intensive processes. Polymers in this group have also found uses in fuel-cells, metal-ion recovery, water electrolysis, plating, surface treatment of metals, batteries, sensors, drug release technologies, gas drying and humidification, and super-acid catalysis used in the production of specialty chemicals. Walther Grot, who invented Nafion® while working for DuPont, has written this book as a practical guide to engineers and scientists working in electrochemistry, the fuel cell industry and other areas of application. His book is a unique guide to this important polymer group and its applications, in membranes and other forms. The 2e expands this handbook by over a third, with new sections covering developments in electrolysis and membranes, additional information about the synthesis and science of the polymer group, and an enhanced provision of reference data.

An essential reference for scientists working with electrolysis and electrochemical processes (the use of this polymer group in industrial chemistry processes is credited with a 1% reduction in global electricity usage) Covers the techniques involved in the growing range of applications for fluorinated ionomers, including fuel cells, batteries and drug delivery The only book on this important polymer group, written by Walther Grot, the inventor of the leading fluorinated ionomer, Nafion® from DuPont

From reader reviews:

Melissa Sanders:

In this 21st one hundred year, people become competitive in most way. By being competitive today, people have do something to make these survives, being in the middle of the crowded place and notice by means of surrounding. One thing that oftentimes many people have underestimated the idea for a while is reading. Yep, by reading a reserve your ability to survive increase then having chance to remain than other is high. For yourself who want to start reading any book, we give you this Fluorinated Ionomers, Second Edition (Plastics Design Library) book as basic and daily reading guide. Why, because this book is usually more than just a book.

Clarine Davidson:

Here thing why this specific Fluorinated Ionomers, Second Edition (Plastics Design Library) are different and reputable to be yours. First of all looking at a book is good but it really depends in the content of it which is the content is as tasty as food or not. Fluorinated Ionomers, Second Edition (Plastics Design Library) giving you information deeper and different ways, you can find any publication out there but there is no guide that similar with Fluorinated Ionomers, Second Edition (Plastics Design Library). It gives you thrill reading through journey, its open up your own personal eyes about the thing which happened in the world which is probably can be happened around you. It is easy to bring everywhere like in area, café, or even in your means home by train. Should you be having difficulties in bringing the paper book maybe the form of Fluorinated Ionomers, Second Edition (Plastics Design Library) in e-book can be your alternative.

Phyllis Spencer:

This Fluorinated Ionomers, Second Edition (Plastics Design Library) is great publication for you because the content and that is full of information for you who else always deal with world and also have to make decision every minute. This particular book reveal it info accurately using great manage word or we can declare no rambling sentences included. So if you are read that hurriedly you can have whole data in it. Doesn't mean it only gives you straight forward sentences but hard core information with beautiful delivering sentences. Having Fluorinated Ionomers, Second Edition (Plastics Design Library) in your hand like having the world in your arm, info in it is not ridiculous a single. We can say that no book that offer you world inside ten or fifteen moment right but this publication already do that. So , this really is good reading book. Heya Mr. and Mrs. stressful do you still doubt this?

Tia Sargent:

As a student exactly feel bored to be able to reading. If their teacher requested them to go to the library as well as to make summary for some book, they are complained. Just little students that has reading's heart and soul or real their pastime. They just do what the instructor want, like asked to go to the library. They go to there but nothing reading really. Any students feel that reading through is not important, boring and can't see

colorful pictures on there. Yeah, it is to get complicated. Book is very important in your case. As we know that on this period of time, many ways to get whatever we want. Likewise word says, many ways to reach Chinese's country. Therefore this Fluorinated Ionomers, Second Edition (Plastics Design Library) can make you truly feel more interested to read.
