## Out of the Margin: Feminist Perspectives On Economics

*Out of the Margin* is the first volume to consider feminist concerns across the entire domain of economics. The book addresses the philosophical roots of 'rational economic man', power relations and conflicts of interest within the family, the limitations of relying on secondary data and the policy implications of neo-classical models.

With its range and depth of coverage this is not only an excellent introduction to the field but also indispensable for those seeking more in depth knowledge of issues of gender and economics.
